

Sprint 2 Plan
Shipsterr
07/09/2019

Goal: Implement and combine the Html pages with the main program functions by adding the determinate “API’s” in order to be available to test it.

Task List:

User Story 1: Implement the CSS styling to our HTML pages

Task 1 - Implement the Design CSS at Home Page, Shipping Calculator, and Delivery Details pages.

Task 2 - Complete the majority of HTML files pages.

Task 3 - CSS file to format our website more precisely.

Total time: 9 hours(total)

User Story 2: Implement the connection of our HTML pages in order to be functional.

Task 1 - Create JS file(s) that makes our UI functional(working buttons and collecting information for Home Page and Shipping Calculator Page.)

Task 2 - Implement and connect the FedEx API to our HTML Shipping Calculator page.

Task 3 - Implement and connect the USPS API to our HTML Shipping Calculator page.

Task 4 - Implement and connect the UPS API to our HTML Shipping Calculator page.

Total time: 9 hours(each person)

Team Roles:

Cary - Backend JS, UPS API (Research Tools how to implement)

Gia - Scrum Master, Backend JS, USPS API (Research Tools how to implement)

Daniel - Connect the HTML pages to be functional, create and add more styling with CSS to our pages.

Nikola - [Out of the country] Researching Javascript and frameworks(Bootstrap)

Raeeka - Backend JS, FedEx API (Research Tools how to implement)

Initial Task Assignment:

Cary - As a customer of UPS, I want to be able to select UPS shipping label even though if it is a little bit more expensive, because I like the company; Research and implement UPS API

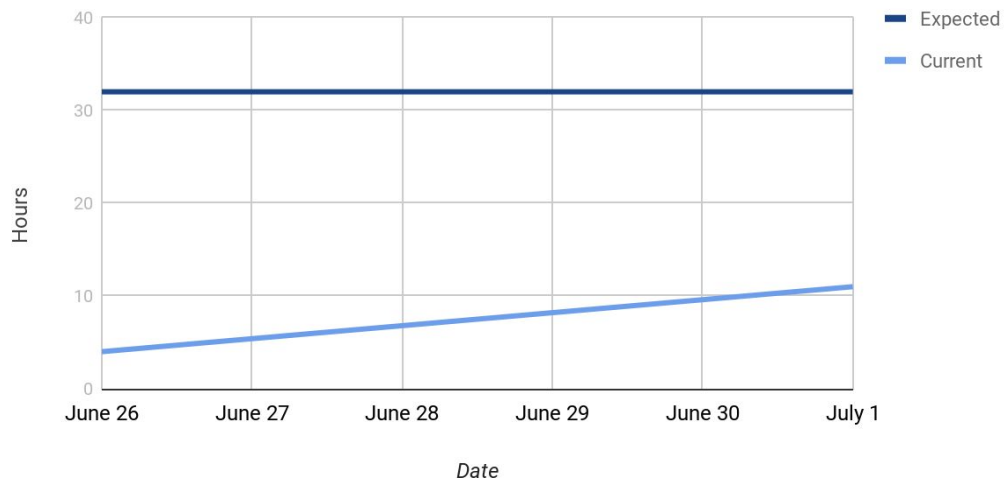

Gia - As someone who likes to send small packages to my friends, including USPS would be best because it is generally most cost efficient amongst the other shippers; Research and implement USPS API.

E.Daniel - Create and implement new styling CSS to our HTML pages, create the functional connection to be functional our website.

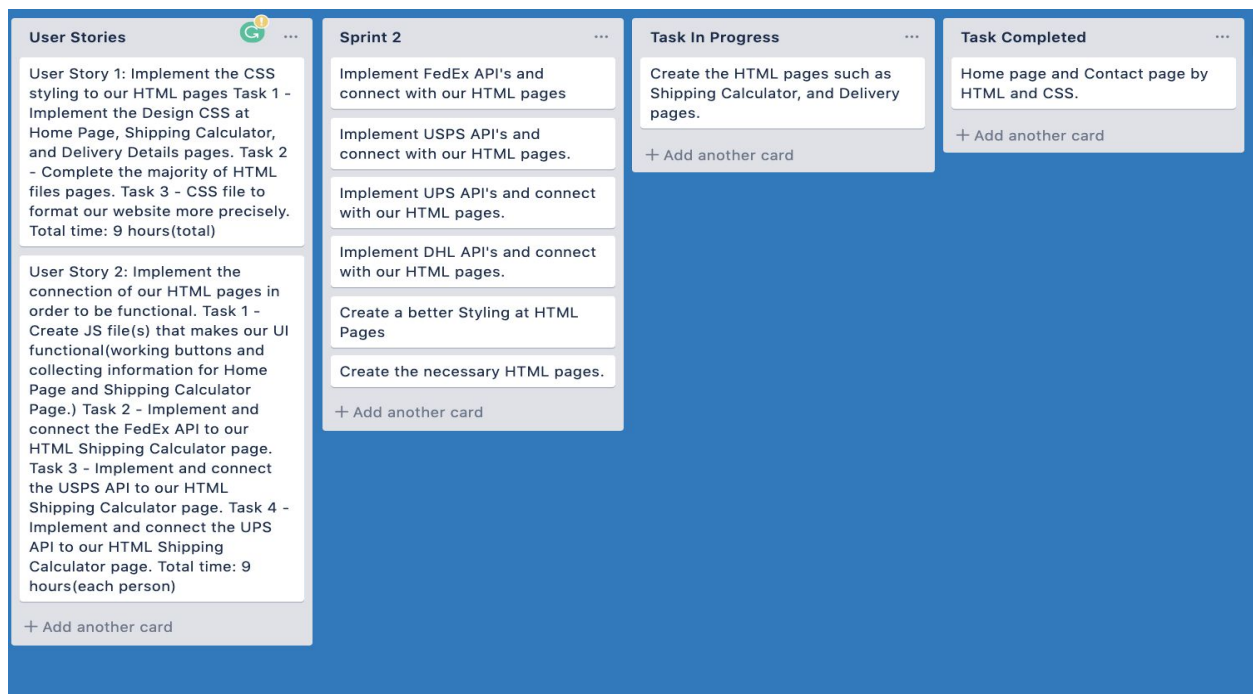

Nikola - As a user, I want a website that is functional and ensures that all buttons are functional and works as expected; Research Javascript and how to use frameworks like Bootstrap.

Raeeka - As a consumer of small online retailers, I would like to implement features so that our application can be versatile and lower costs for package senders/receivers; Research and implement FedEx API

Burnup Chart:

Initial scrum board:

<https://trello.com/b/qgw35RWV/shipsterr>

Scrum times:

Monday: 12:30-1:30

Wednesday: 12:30-1:30

Thursday: 3:00-3:45
